REACH-Regulation 1907/2006/EG

Dear Customer,

The European Regulation No. 1907/2006 for the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) came into effect on June 1, 2017. MICROMO Electronics, Inc. is not a manufacturer or importer of chemicals or preparations thereof who is responsible for its own compliance with the registration. Instead, we are an indirect user in terms of this regulation.

However, as an indirect user, we undertake the necessary communication with our suppliers to assure that any chemicals utilized are in compliance with the REACH regulation.

Regarding the information required under Article 33 of REACH, we are pleased to inform you that to our knowledge, none of the articles supplied to you, including our packaging materials, contain any of the materials on the candidate list (date 12/01/2017 – 173 substances) with a mass above 0.1%.

Thank you for your continued business,

Mark R. Waddell

Quality Manager
